FEMA-4015-LA

Narratives**Disaster Damage:**

On Wednesday, August 29, 2012, Hurricane Isaac made landfall on the Louisiana Coast as a Category 1 Hurricane causing substantial and widespread wind damage and flooding in the City of New Orleans, leaving the majority of the city's residents, businesses, and streets without electrical power for days. The storm stalled over Southern Louisiana over a 48-hour period, at times moving as slowly as 6 miles per hour.

During the storm high winds and continuous rainfall produced by Hurricane Isaac caused significant damage to the City of New Orleans. The hurricane force winds downed power lines, trees, and light poles, and created massive disaster related debris within the City's rights of way. Storm surges caused serious damages to facilities and infrastructure located outside of the City's levee protection systems.

Recovery Needs:

Hurricane Isaac was primarily a slow moving, heavy rain and high wind event. As a result, substantial costs were incurred in repairing damage to the City's drainage system, which had been clogged with debris from the storm, removing debris from roadways and public areas, collecting debris from private property, repairing water damage to public buildings, restoring street signals and street lights, and performing other repair and cleanup activities.

These activities were undertaken with the assistance of the Federal Emergency Management Agency (FEMA) which assisted in assessing damage and providing funding to begin the recovery process. Therefore, the bulk of the funds subject to this Action Plan will be utilized to meet the City's cost share responsibilities to FEMA, to reimburse the City for eligible expenses of storm recovery, and to complete the activities that were not fully funded by FEMA funding.

The City took actions to provide temporary housing to persons displaced by Hurricane Isaac. In addition, the City's housing officials conducted field visits and site visits of assisted housing units across the City and found no significant damage.

The City obtained from HUD, FEMA, and the State of Louisiana additional data for estimates of damage to Owner Occupied Housing and Rental Units. That information confirmed the field inspections conducted by the City after the Hurricane. The vast majority of the damage to owner occupied properties was minor — 92% of the Owner Occupied Housing had losses that averaged \$687.00.

In an effort to utilize the scarce resources available for housing activities, the City has implemented a comprehensive approach to improving substandard housing, particularly those units damaged by declared disasters. To that end, the City works with its partners to identify both disaster and also non-disaster federal, state, corporate, and nonprofit

Recovery Needs:

funding sources available to assist residents in their recovery efforts.,

,
In December 2012, the City issued a Request for Proposals to award HOME funds for eligible activities including rehabilitation of substandard occupied rental properties. None of the applications identified Hurricane Isaac as a factor in the need for rehabilitation funding.

,
Recently the City awarded nearly \$5 million of its HOME allocation to not-for-profit organizations who perform Owner Occupied Rehabilitation programs. These organizations assist low-income homeowners who either are displaced because they do not have sufficient resources to complete repairs to their homes or are living in substandard conditions because they do not have the financial resources to undertake repairs to their homes. These organizations will prioritize low-income homeowners who are unable to return to their homes because of damage caused by disasters including Hurricane Isaac.

,
These organizations received this funding based upon their performance under prior contracts and have demonstrated the capacity to manage these funds, to complete rehabilitation of homes, and to serve those households with the greatest need.

National Objective	Target	Actual
Low/Mod	\$7,515,500.00	\$2,278,143.04

Overall Progress Narrative:

Hurricane Isaac was primarily a slow moving, heavy rain and high wind event. As a result, substantial costs were incurred in repairing damage to the City’s drainage system, which had been clogged with debris from the storm, removing debris from roadways and public areas, collecting debris from private property, repairing water damage to public buildings, restoring street signals and street lights, and performing other repair and cleanup activities.

The City used force account labor such as NOPD, EMS, and NOFD to provide necessary recovery services during and immediately after the storm to ensure the safety of citizens directly related to the threat of Hurricane Isaac.

The City cleaned thousands of catch basins after the storm to minimize the risk of future flooding of subsequent heavy rain events. Several tons of hazardous debris was removed from the public right of way to provide access to streets and homes as well as improved safety to the citizens.

The City took actions to provide temporary housing to persons displaced by Hurricane Isaac. In addition, the City’s housing officials conducted field visits and site visits of assisted housing units across the City and found no significant damage.

These activities were undertaken with the assistance of the Federal Emergency Management Agency (FEMA) which assisted in assessing damage and providing funding to begin the recovery process. Therefore, the bulk of the funds subject to this Action Plan will be utilized to meet the City’s cost share responsibilities to FEMA, to reimburse the City for eligible expenses of storm recovery, and to complete the activities that were not fully funded by FEMA funding.

Activity Description:

Costs associated with staffing to administer the CDBG-DR funds awarded for Hurricane Isaac. Includes office supplies, travel, training, etc.

Location Description:

Activity Progress Narrative:

Admin expenses for this quarterly report are broken down as follows:

\$306.00 for travel expenses. The City of New Orleans sent representatives to a DRGR training to learn how to use the system, which is a requirement for this grant.

\$15,990.05 for project/grant manager salary. The City of New Orleans has staffed one project manager to manage the Isaac

Grant.

Activity Description:

Demolition of various properties damaged due to Hurricane Isaac. Total project budget \$631,000.

Location Description:

Citywide

Activity Progress Narrative:

The City of New Orleans demolished a total of 41 private residential structures from third quarter 2012 through third quarter 2013. These specific structures were identified as an imminent risk to public health and safety and therefore were demolished with the use of a contractor, Durr Heavy Construction. The national objective of this activity was to allocate funds to areas of low-moderate income levels. The CNO met this national objective with 31 out of the 41 structures demolished in LMI areas. The total percentage was 75.61%. Please see supporting documents for specific addresses.
