Appendix II. Ongoing DPW (Streets) Capital Projects

Appendix III. Capital Projects for Future Bond Funding Consideration

1. INTRODUCTION AND SUMMARY OF RECOMMENDATIONS

Purpose of the Capital Improvement Plan (CIP)

The Capital Improvement Plan (CIP) is a five-year program for expenditures by the City of New Orleans for permanent physical improvements. The CIP is prepared and adopted annually by the City Planning Commission and is presented as a recommendation to the Mayor and the City Council. Each year, the plan identifies the physical needs of the City's agencies, estimates the costs of proposed projects, and recommends expenditures and sources of funding for priority capital improvements. As such, the CIP plays an integral role in the process of formulating the City's annual capital budget.

Projects considered through the CIP process involve proposed investments in the City's infrastructure and facilities, such as streets, police and fire stations, parks and recreation facilities, libraries, community centers, offices, sanitation facilities, museums and cultural facilities. Although not defined in the Home Rule Charter, capital improvements are referred to there as "permanent physical improvements" and have conventionally been considered by the City as improvements that are expected to have a normal life of ten years or longer.¹ Equipment and objects needed for day-to-day use by City agencies are generally not considered capital improvements. Smaller projects and projects that are intended to last for fewer than ten years are funded through the City's operating budget.

Legal Foundation

The City Planning Commission is required under Section 5-402 (4) of the Home Rule Charter of the City of New Orleans to prepare the City's capital improvement plan and to assist the Chief Administrative Officer in the preparation of the annual capital budget. The Home Rule Charter further requires that the capital improvement plan and the capital budget be consistent with the City's Master Plan.

¹ The proposition that enabled the sale of general obligation bonds in 2004 also specifically stated that the funds could only be used for projects that would have a normal life of ten years or longer. City Council Resolution No. R-04-648, Section 2.

CIP Development Process

Process Overview and Submittal of Funding Requests

Each year, the City's Chief Administrative Officer issues a memorandum setting forth the process and schedule for the preparation and adoption of the City's capital budget. Beginning in April of 2014, each agency of the City was asked to meet with representatives of the Capital Projects Administration for assistance with the preparation of capital budget requests. On June 13th, the Capital Projects Administration transmitted copies of all completed capital budget request forms to the City Planning Commission staff. Each request form included the reasons for each proposed improvement project, its estimated acquisition and construction costs, the estimated costs of annual operation and maintenance for the facility, the proposed dates of initiation and completion of the project, the source of funding required for the project in each of the following five years, and the agency's priority rating for the project. The priority rating is based on scores assigned by the agency for each of seventeen rating categories, including *Public Health and Safety*, *Percent of Population Served by Project*, *Availability of Financing*, *Relation to Adopted Plans*, and *Public Support*, among others.

Public Hearings with Requesting Agencies

Between June 23rd and July 7th, the City Planning Commission staff held public hearings with representatives of each agency that had submitted a request. The hearings were intended to provide further background information on each proposed project, answer questions, and obtain input from the public. On July 18th, the Chief Administrative Officer provided the City Planning Commission staff with a statement of the funds that were likely to be available for capital expenditures between 2015 and 2019, including bond issues, federal and state grants, insurance proceeds, FEMA reimbursements, and miscellaneous capital funds generated from the sale of City property.

City Staff Analysis and Draft Plan Preparation

The City Planning Commission staff then performed a detailed analysis of the requests and prepared the draft capital improvement plan. This year's CIP, similar to the ones for 2006 through 2014, was the product of strong collaboration between the staff of the City Planning Commission and the staffs of the Capital Projects Administration, the office of the Deputy Mayor for Facilities, Infrastructure, and Community Development, and each of the agencies that submitted a capital improvement proposal.

Consideration and Adoption by the City Planning Commission

The City Planning Commission staff then presented an initial draft of the plan to the City Planning Commission's Planning and Special Projects Committee, which worked with the staff to provide guidance and set priorities. The staff then prepared the draft plan for presentation at the City

Planning Commission's public hearings on September 9th and 23rd, 2014. Following the public hearings, the City Planning Commission considered and adopted the plan with final recommendations. The City Planning Commission now forwards the plan to the Mayor as directed by the Chief Administrative Officer. Upon receipt of the CIP, the Mayor will prepare a message to the City Council setting forth his recommendations, which will be transmitted by the Chief Administrative Officer along with a proposed capital budget ordinance for 2015. The City Council will consider the CIP and will adopt a capital budget for 2015 prior to its adoption of the City's operating budget, which must occur no later than December 1st, 2014.

Throughout the plan, the City Planning Commission's recommended actions are indicated by three different abbreviations. The symbol "A" indicates that funding for the proposed project is recommended for approval in the amount listed for 2014. The symbol "CR" indicates that capital funding is recommended to be held in reserve for appropriation in a capital budget ordinance for one of the future years in the plan. The symbol "D" indicates that funding for the proposed project is recommended to be deferred beyond the period of the five-year capital improvement plan.

Capital Improvement Plan Funding Sources

The proposed 2015-2019 Capital Improvement Plan has a total source of funds of \$883,153,757. This figure constitutes the sum of six separate funding sources. The amount of each funding source by year is provided in Section 2.2 of the Capital Improvement Plan report. A brief explanation of each funding source is provided below.

General Obligation Bonds

On November 2, 2004, the voters of the City of New Orleans approved the issuance of up to \$260 million of general obligation bonds to finance capital improvements throughout the city. With the 2014 Capital Improvement Plan and the 2014 Capital Budget Ordinance, the City had applied all of these funds to capital projects. A total of \$65,000,000 of bonds for 2014 projects will be sold later in 2014 or in early 2015, and will provide funding for a number of ongoing projects. A list of those projects is presented later in the report.

FEMA Reimbursement Funds and Federal Roadway Funds

Federal Emergency Management Agency (FEMA) Public Assistance funds constitute a second major source of funding in this year's Capital Improvement Plan. Because obligations from FEMA are revised on an ongoing basis, projects budgets fluctuate and amendments to the capital budget ordinance are necessary throughout the year. The total forecasted amount of FEMA reimbursement funds in this CIP is \$262,702,303. The majority of this funding – \$251,428,428 – is projected to come from reimbursements for street repair projects. The remainder of this funding is projected to come from reimbursements for New Orleans Fire Department facilities. FEMA reimbursement funds are indicated in this report with the designation "FEMA" next to the anticipated amount. In other years, the Capital Improvement Plan has included federal roadway funds, which are matching funds provided by the federal government on projects where bond funds or other funding sources are involved.

Self-Generated Funds

In addition to the sources listed above, some City agencies obtain funds for capital improvements from other sources, including self-generated revenues and federal and state grants. The French Market Corporation generates revenues from leases and other fees that are sufficient to entirely fund their planned capital improvements. These funds are designated "FMC" within this plan. The New Orleans Aviation Board also raises funds through user fees, in addition to federal and state grants and general airport revenue bonds, all of which can only be used for airport-related projects. Projects using these funds are indicated in this plan with the abbreviation "NOAB." Finally, the New Orleans Mosquito Control Board generates certain funds through the provision of services. A small amount of this funding is projected for use in repairing the roof of that agency's biolab, although the funding is not sufficient to completely fund the project, and additional funds will need to be identified.

Miscellaneous Capital Funds and State Capital Outlay Funds

Two other funding sources are also utilized for capital improvements: state capital outlays and miscellaneous capital funds. State capital outlays are funds provided by the State of Louisiana to government subdivisions to fund specific capital improvements as indicated in an annual Act of the State Legislature. State capital outlay funds are indicated by the abbreviation "SCO" in this plan. Miscellaneous capital funds are other funds received and held by the City for capital improvements. They generally consist of proceeds from the sale of City-owned property. Miscellaneous capital funds are not a major source of capital funds, and generally amount to approximately \$250,000 each year. Recommendations for the use of miscellaneous capital funds are indicated in the plan by the abbreviation "MCF."

Ongoing Capital Improvement Projects

According to figures provided by the Capital Projects Administration, as of August, 2014, the City had 112 ongoing non-street capital projects with a cost of \$280,947,752, and 172 street capital projects with a cost of \$546,338,515. Overall, this amounts to a total of 284 projects with a total cost of \$827,286,267. Lists of these projects are provided in Appendices I and II. Additionally, the City ordained a total of 46 projects with the total remaining bond funding of \$65,000,000 for 2014 (Ordinance 25,579 M.C.S.). The City anticipates being able to sell these bonds in late 2014 or early 2015 in order to begin working on these projects. The projects are listed in the table below. Although there is limited funding available for capital projects from other sources, this funding will keep the City actively engaged in developing capital projects through 2015 and into 2016.

Project	Agency	Bond Funding Amount (\$)
Improvements to the Fly	Audubon Commission	400,000
Energy Management	Chief Administrative Office	8,358,613
Conservatory/Plaza Expansion	City Park Imp. Association	700,000
NOFD Roof Repairs	NOFD	367,054
Engines 33 and 40	NOFD	50,000
Augmentation to FEMA Repairs	NOMA	300,000
2nd District Station	NOPD	2,200,000
4th District Station	NOPD	100,000
Citywide Building Repairs	Property Management	800,000
Enhancements	DPW	750,000
Major Streets Program	DPW	3,569,943
Minor Streets Program	DPW	31,105,211
Arterials – Urban Systems	DPW	7,100,000
Hardin Playground	NORDC	650,000

Security Camera Systems	NOPL	149,500
Learning Lab and Homework Help Center	NOPL	121,200
CRC HVAC Replacement	NOPL	508,224
TOTAL		65,000,000

Overview of the 2015-2019 Capital Improvement Plan Recommendations

An overview of recommended capital improvement expenditures by program grouping is provided in Section 2.4 of the plan report. Highlights of the funding recommendations for each program grouping are presented below. These summaries only include funding

Airport Improvement Projects

The largest category of funding in the CIP is for the Louis Armstrong New Orleans International Airport, which is operated by the New Orleans Aviation Board. The Aviation Board's funding, which is entirely self-generated, is proposed to be used primarily for the construction of a new terminal facility on the north side of the existing east-west runway. Several other smaller improvements to the airport, including taxiway improvements and electrical rehabilitation, are also planned over the course of the five-year period.

² The City Planning Commission staff has been informed by the New Orleans Public Library that it is working toward an amendment to the capital budget ordinance regarding certain projects and funding amounts. Any amendment would not affect the total amount of funds allocated to the library, which was fixed by the resolution approved by voters in 2004.

Street Improvement Projects

Aside from airport projects, street projects by the Department of Public Works constitute the largest portion of the CIP, with a total expenditure of \$251,428,428. The entirety of this funding is expected to come from FEMA reimbursement funds for streets damaged as a result of Hurricane Katrina. The Department of Public Works anticipates conducting a survey of street conditions across the city to identify priority street projects that will be undertaken if additional general obligation bond sales are approved by voters in the future.

Parks and Recreation Facilities

Funding for parks and recreation facilities was provided in the 2014 capital budget ordinance. Additional funding sources will need to be identified and approved in the future to support additional investments in parks and recreation facilities.

Public Safety Facilities

This year's CIP reflects \$7,773,875 of public safety facility funding, which is a total comprised of both FEMA funds and State Capital Outlay funding. The CIP anticipates that some portion of any future funding source would be used for public safety facilities, including the completion of the 2nd District NOPD station and other projects.

Libraries and Museums

Funding for libraries and the New Orleans Museum of Art was most recently provided through bond funds included in last year's CIP and capital budget ordinance. The New Orleans Public Library submitted proposals for future funding for an additional branch library and for a facility to house the City's archives, and the New Orleans Museum of Art submitted proposals for ongoing capital needs, such as the elevator and HVAC systems. Major projects, such as new library branches, would require significant additional funding in the future.

Other Public Facilities

The majority of the funding for other public facilities will come in the form of self-generated funds from the French Market Corporation that will be used to maintain and improve the French Market and the Upper Pontalba Building. Smaller amounts of funding from miscellaneous capital funds will be used to provide for maintenance of the Recovery One Landfill and for citywide building repairs by the Department of Property Management. Additionally, the City will use FEMA funding to make major capital improvements to City Hall, including elevators, the roof, and HVAC systems. Additional funding sources will need to be identified in the future to provide for other public facilities.

Master Plan Consistency

The Home Rule Charter requires that the Capital Improvement Program, the capital budget, and any decision to construct a capital improvement must be consistent with the City's Master Plan.³ The Charter specifically states that any decision to construct a capital improvement is consistent with the Master Plan if it: a) furthers, or at least does not interfere with, the goals, policies, and guidelines, including design guidelines, that are contained in the Land Use Element of the Master Plan, and b) is compatible with the proposed future land uses, densities, and intensities designated in the Land Use Element of the Master Plan. Capital Improvement Program project proposals therefore must be certified by the City Planning Commission as consistent with the Master Plan's Land Use Plan in order to be recommended for funding. Proposed projects may also be supported by goals and policies of other elements of the Master Plan, including those pertaining to environmental quality, green infrastructure, economic development, community facilities and infrastructure, and transportation. Finally, it is important to note that some requests are for projects without a selected location. In these cases, Master Plan consistency can only be certified with respect to policies supporting the proposed improvement. Funds for property acquisition may be recommended, but the specific location and design of the proposed facility must be certified by the City Planning Commission prior to undertaking the project.

For projects with designated locations in the plan, the following codes are used to indicate the designation of the site on the Master Plan's Future Land Use Map (FLUM). The goals, range of uses, and development character for each designation are provided in Chapter 14 of the Master Plan.

Capital Improvement Plan (CIP) Abbreviation	Future Land Use Map (FLUM) Designation
Indust.	Industrial
MUHD	Mixed Use High-Density
NC	Neighborhood Commercial
P&OS	Parkland & Open Space

Conclusion

Aside from pending reimbursements for street projects, federal disaster-related funding will be coming to an end over the course of the five-year period of this Capital Improvement Plan. Additionally, the last of the remaining general obligation bond funds approved by voters in 2004 were programmed for use in the 2014 CIP and Capital Budget Ordinance. With the exception of ongoing FEMA-funded street projects and improvements to the New Orleans International Airport, capital budgets for the years 2015 and beyond are predicted to return to levels similar to those prior to Hurricane Katrina. New sources of funding will need to be considered in the future in order to continue street improvement programs, ensure

³ Sections 5-402 (4) and 5-404 (3) (c) of the Home Rule Charter of the City of New Orleans.

adequate maintenance of public infrastructure, and meet the capital needs identified by multiple City agencies as part of the development of this plan.

The second section of the Capital Improvement Plan report provides summaries of the sources and uses of capital funds for each of the next five years by agency and program category. Additional summaries are provided for the use of general obligation bond funds by agency and by voter-approved purpose. The third section of the report provides Master Plan consistency determinations and detailed funding recommendations for each capital project request from each agency. Finally, the plan report includes an appendix with the status of ongoing capital improvement projects from previous years.

2.1. SUMMARY OF CAPITAL FUND REVENUES BY SOURCE

FUNDING SOURCE	2015	2016	2017	2018	2019	TOTALS
General Obligation Bonds (Bond)	\$0	\$0	\$0	\$0	\$0	\$0
