About BottomLineStat

- BottomLineStat is a performance management system that The City of New Orleans uses to help manage the City's finances, to improve the efficiency of the city's revenue collection system, and to ensure that departments are held accountable for staying on budget
- BottomLineStat is a working meeting where key City staff review data to assess how the City is meeting its goals and to analyze what's working, what's not, and what the City needs to do to improve
- BottomLineStat is one of the PerformanceStats being implemented by the Office of Performance and Accountability, the team in charge of overseeing the City's performance management initiatives, like the ResultsNOLA performance reports
